

Python Math App: Python does your math homework! Code

```
print("MathHomework.py")
```

```
# Ask the user to enter a math problem
```

```
problem = input("Enter a math problem, or 'q' to quit: ")
```

```
# Keep going until the user enters 'q' to quit
```

```
while (problem != "q"):
```

```
# Show the problem, and the answer using eval()
```

```
print("The answer to ", problem, "is:", eval(problem) )
```

```
# Ask for another math problem
```

```
problem = input("Enter another math problem, or 'q' to quit: ")
```

```
# This while loop will keep going until you enter 'q' to quit
```
