

Building Your Own FOR Loops Code

```
#Rosette.py
```

```
import turtle
```

```
t = turtle.Pen()
```

```
t.circle(100) # This makes our first circle (pointing north)
```

```
t.left(90) # Then the turtle turns left 90 degrees
```

```
t.circle(100) # This makes our second circle (pointing west)
```

```
t.left(90) # Then the turtle turns left 90 degrees
```

```
t.circle(100) # This makes our third circle (pointing south)
```

```
t.left(90) # Then the turtle turns left 90 degrees
```

```
t.circle(100) # This makes our fourth circle (pointing east)
```
