

Challenge 2 Viral Family Spiral

ViralSpiralFamily.py - prints a colorful spiral of names

```
import turtle # set up turtle graphics

t=turtle.Pen()

t.speed(0)

turtle.bgcolor('black')

colors=['red', 'yellow', 'blue', 'green', 'orange',
'purple', 'white', 'brown', 'gray', 'pink' ]

family=[] # set up an empty list for family names
```

```
# ask for the first name

name = turtle.textinput("My family",
"Enter a name, or just hit [ENTER] to end:")

# keep asking for names

while name != "":

# add their name to the family list

family.append(name)

# ask for another name, or end

name = turtle.textinput("My family",
"Enter a name, or just hit [ENTER] to end:")
```

```
# draw a spiral of the names on the screen
```

```
# Our outer spiral loop
```

```
for m in range(100):
    t.forward(m*4)
    position = t.position() # remember this corner of the spiral
    heading = t.heading() # remember the direction we were heading
    # Our 'inner' spiral loop draws a family spiral
    for n in range(len(family)):
        t.pendown()
        t.pencolor(colors[n%len(family)%10])
        t.write(family[n%len(family)], font=("Arial", int((m+4)/4), "bold") )
        t.right(360/len(family))
        t.penup()
        t.forward(m//2)
    t.setposition(position) # go back to the big spiral's location
    t.setheading(heading) # point in the big spirals direction/heading
    t.left(360/len(family) + 3) # move to the next point on the big spiral
```
