

Modifying a FOR Loop Code

```
# ColorfulRosettes.py

import turtle

t=turtle.Pen()

turtle.bgcolor('black')

t.speed(0)

t.width(2)

# Ask the user for the number of circles in their rosette, default to 6
number_of_circles = int(turtle.numinput("Number of circles",
"How many circles in your rosette?", 6))

for x in range(number_of_circles):

    t.pencolor('red')

    t.circle(100)

    t.pencolor('yellow')

    t.circle(50)

    t.left(360/number_of_circles)
```
